

AMENDMENTS TO THE CLAIMS:

The following listing of claims replaces all prior listings, and all prior versions, of claims in the application.

Listing of Claims:

1. (Currently Amended) An electroconductive resin composition, comprising:
 - (a) 40-70 % by weight of semi-crystalline polyamide resin;
 - (b) 15-40 % by weight of thermoplastic elastomer grafted with 0.5-2.0 % by weight of maleic anhydride;
 - (c) 9-20 % by weight of carbon black powder;
 - (d) 1-10 % by weight of sulfonamide ~~based material~~, represented by the following formula 1; and
 - (e) 0.001-0.02 % by weight of dicarboxylic acid ~~dicarboxyl based material~~, represented by the following formula 2.

Formula 1

(wherein, R_1 and R_2 are selected from the group consisting of alkyl, benzyl, phenyl, alkylphenyl and dialkylphenyl, wherein the alkyl is $C_nH_{2n+1}(n \leq 8)$)

Formula 2

2. (Original) The composition as defined in claim 1, wherein the polyamide resin is selected from the group consisting of polyamide-6, polyamide-66, polyamide resin copolymers thereof, or mixtures thereof, and has a relative viscosity of 2.8-3.5.

3. (Original) The composition as defined in claim 1, wherein the carbon black is selected from the group consisting of furnace black, Ketjen black, acetylene black and thermal black, and has a specific surface area (BET) of 500 m²/g or more and an oil absorption (DBP) of 200 ml/100 g or more.

4. (Currently Amended) The composition as defined in claim 1, wherein the ~~sulfonamide based material~~ of the formula 1 is selected from the group consisting of N-propyl benzene sulfonamide, N-butyl benzene sulfonamide, N-hexyl benzene sulfonamide, N-octyl benzene sulfonamide, N-phenyl benzene sulfonamide, N-dimethylphenyl benzene sulfonamide, N-isopropylphenyl benzene sulfonamide, N -butylphenyl benzene sulfonamide, N-methyl methylbenzene sulfonamide, N-ethyl methylbenzene sulfonamide, N-butyl methylbenzene sulfonamide, N-butyl butylbenzene sulfonamide, N-butyl isopropylbenzene sulfonamide, N-butyl butylbenzene sulfonamide, N-phenyl methylbenzene sulfonamide, N-dimethylphenyl methylbenzene sulfonamide, N-isopropylphenyl methylbenzene sulfonamide, or mixtures thereof

5. (Original) The composition as defined in claim 1, wherein the thermoplastic elastomer is selected from the group consisting of polyethylene, polypropylene,

polybutene, polyisoprene ethylene-propylene rubber, ethylene-propylene-diene rubber, ethylene-butene rubber, ethylene-octene rubber, ethylene-acryl rubber, styrene-ethylene-butylene-styrene copolymer, or mixtures thereof.

6 (Original) The composition as defined in claim 1, wherein the relative viscosity of the semi-crystalline polyamide resin is measured for a solution of 1 g of resin in 100 ml of 96 % sulfuric acid with Ubbelohde viscometer.

7. (Currently Amended) The composition as defined in claim 1, wherein the ~~dicarboxyl based material~~ dicarboxylic acid of the formula 2 has an n-value ranging from 1 to 20.

8. (Previously Presented) A molded product for a motor component prepared from the resin composition of claim 1.

9. (Original) The product as defined in claim 8, wherein the motor component is a fuel filter housing or a fuel line.

10. (Previously Presented) A molded product for a motor component prepared from the resin composition of claim 7.

11. (Previously Presented) The product as defined in claim 10, wherein the motor component is a fuel filter housing or a fuel line.
